

Evidence for Rapid Authoring approach

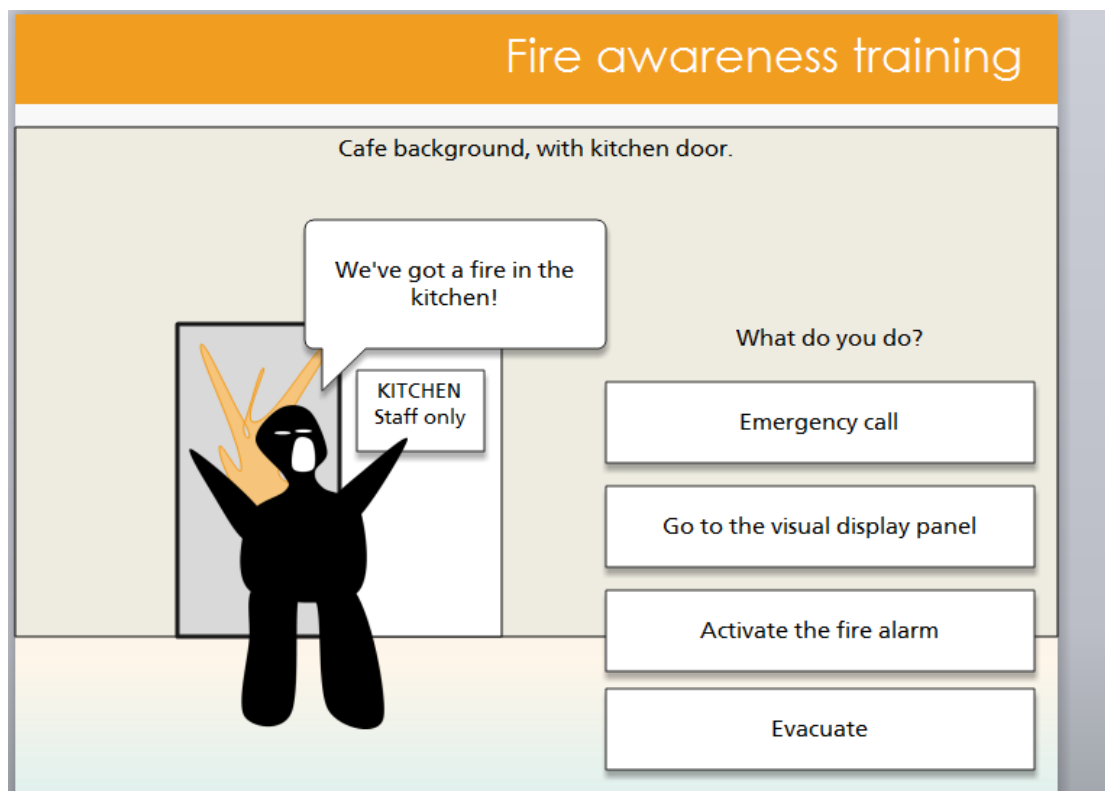

What is this?

Iteration for 1 scenario in the Fire Awareness training

Café fire

- Morning coffee with peers
- Smoke from kitchen
- Screams for help
- Manual call point activation
- Call 777
- Move to evacuation
- RACE Principle

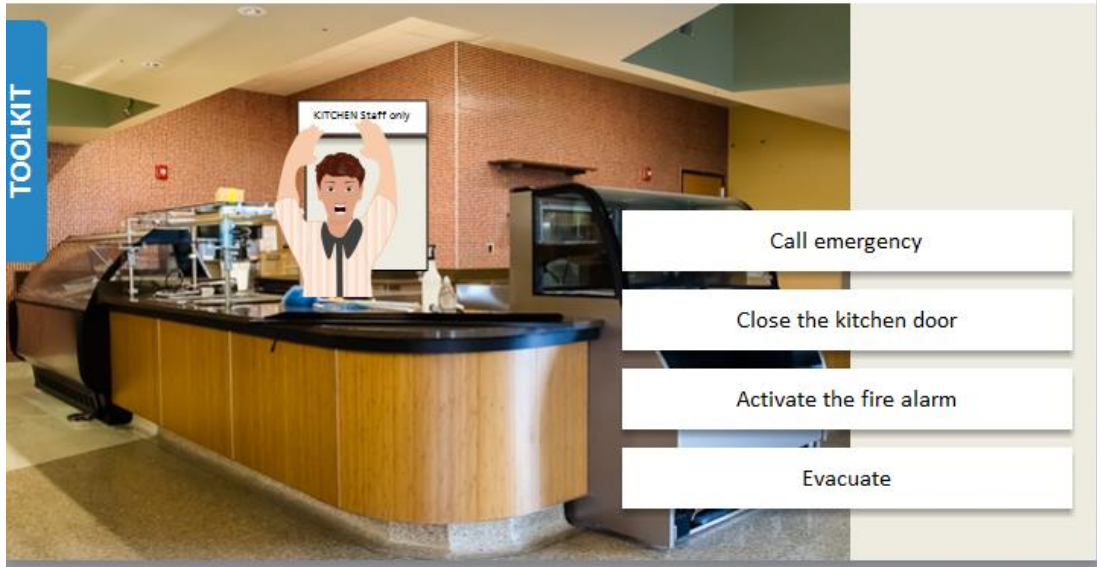

Iteration step 1: SME scenario in bullet points on screen

Iteration step 2: Quick design in Storyline of decision screen 1 (3 first bullet points of word scenario in iteration 1)

Fire awareness training

Iteration step 3:

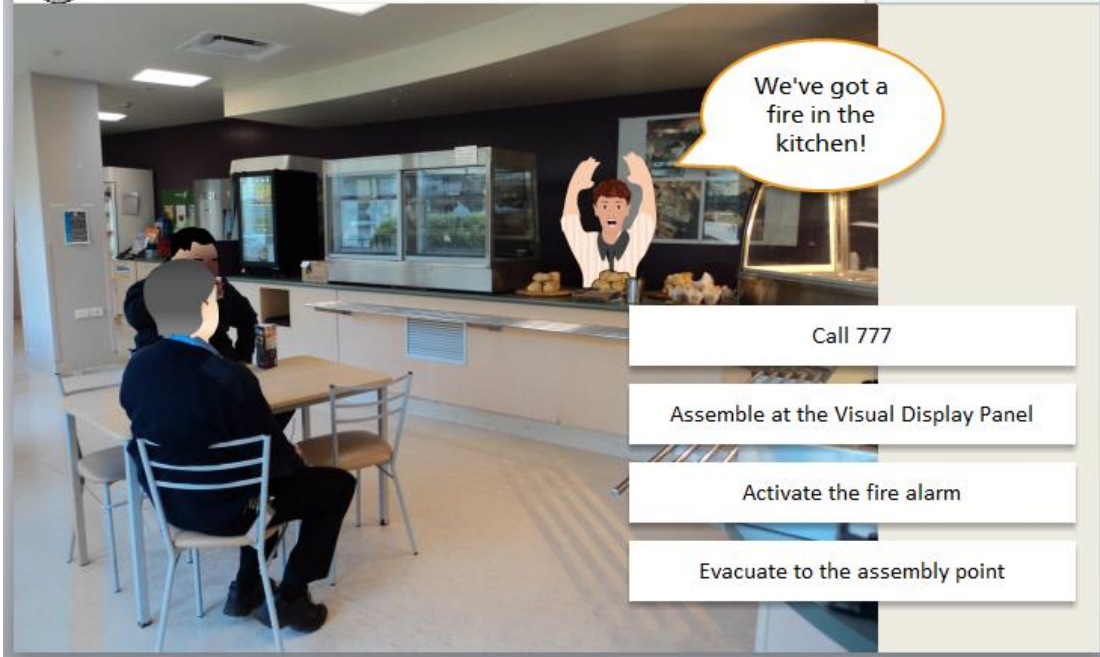

- Decision choices adapted after SME consultation with quick design as in step 2.
- Addition of internet photo as sample of required background.
- Design of panicked café assistant completed in Powerpoint and added.
- Toolkit for learner to consult theory added on side

Fire awareness training

We've got to help Steve!

Consult toolkit

Iteration step 4:

- Further refinement of decision choices after consultation with SME based on step 3
- Insertion of real life picture of staff cafeteria (provided by SME)
- Cartoonified security guys who volunteered to be in photo
- Changed layout for better UX of screen. Toolkit moved.
- Addition of character providing situation instruction on top
